Review & Approval of Minutes	Approval of August 2020 Minutes	Approved.	Damon Obiden
Public Comment			
Region 6 Report	Region 6 is holding steady and continuing to do just in time training with partners. Video for training for EMResource Hospital COVID Board Update that was created with MDHHS data team will be shared out soon.		Luke Aurner / Tim Dickman
Old Business/ Standing Items			

New Business	1. Discussion on combining with Communications Committee
	   o The communications committee is not only discussing 800 MHz, they are also addressing other communication methods. The same group of people tend to attend both meetings. We are looking at combining the Communications and Juvare group together and having Jeff and Damon co-chair and extend the time length of the meeting.
	2. SBAR Presentation for Airport Alert / MCI Alert
	   o After recent airport exercise we realized that the Kent County Airport alerts only go out to Kent County agencies. Different options for how to correct this were discussed.
	3. MCI Alert after confirmation
	   o We are currently working on getting MCI alerts sent out properly with correct information and timely. Discussion took place about changing algorithm to have the number of patients confirmed prior to MCI alert being sent out. Luke is going to work on the education side with EMS dispatch agencies. Reevaluate after education has been completed in 3 months.
		Recommendation for region to plan a workshop on what it looks to run through an MCI.	Luke Aurner
